

Thornburg Limited Term Income Fund (the "Fund")

I GBP Accumulating (Hedged) IE000JFF3EZ9

A sub-fund of Thornburg Global Investment plc (the "Company")

The Manager of the Fund is Waystone Management Company (IE) Limited (the "Manager").

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

The Fund's primary objective is to provide as high of a level of current income as possible while at the same time seeking to preserve capital.

The Fund seeks to achieve its objective through investing (under normal market conditions) at least 65% of its Net Asset Value ("NAV") in (i) obligations of the U.S. government, its agencies and instrumentalities and (ii) A or Above Debt Securities.

The Fund may also invest up to 35% of its NAV in BBB or Baa Debt Securities if such instruments are consistent with the Fund's objective.

The Fund typically expects to maintain an average maturity of less than 5 years.

The Investment Manager seeks to identify a portfolio of investments based on analysis of the fundamental creditworthiness of the issuer, the value of the security based on credit analysis comparisons to market price, and to ensure portfolio diversification.

Financial Derivative Instruments ("FDI") are utilised for the purposes of hedging currency risk and investment purposes. The Fund may invest up to 10% of its NAV in other funds with similar investment policies.

The Fund is actively managed and is not constrained by any benchmark. However, the Fund uses the Bloomberg Intermediate US Govt/Credit TR Index Value Unhedged USD in the Fund's marketing materials to compare performance.

Any income less expenses realised will be accumulated and reinvested into the NAV of the Fund.

Investors can buy or sell shares on any day on which banks in Dublin are open and the New York Stock Exchange is trading.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

Recommendation: This Fund is not suitable for investors unable to maintain a long term investment.

Risk and reward profile

The Fund is in category 3 as the assets it holds have historically been subject to low to moderate levels of price fluctuation. The category shown is not guaranteed and may change over time. It is based partially on historical data of a similar fund of the Investment Manager, and may not be a reliable indication of future circumstances. The lowest category does not mean a risk free investment.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

Debt Securities & Obligations Risk: Debt Securities and government obligations are affected by changes in interest rates, and credit quality. The value of securities may fluctuate in response to changing economic conditions or the perceived creditworthiness of an issuer. When interest rates rise, bond prices may fall because investors may be able to obtain a more attractive rate of interest elsewhere. The Fund will be more sensitive to interest rates depending on the average maturity or average duration of its bond investments.

U.S. Government Obligations & Securities Risk: securities issued by the U.S. Government, its agencies, authorities or instrumentalities are only guaranteed as to principal and interest and those not issued by

the U.S. Government itself may not be backed by its full faith and credit.

Sovereign Debt Risk: debt instruments issued by governments or governmental entities are at risk that the issuer may delay or refuse to pay interest or principal due to, e.g. cash flow problems, insufficient currency reserves, economic or political concerns, etc. No legal processes exists for collecting sovereign debt upon default, nor bankruptcy proceedings through which sovereign debt can be repaid to bond-holders. As such, a default by an issuing country may result in a loss to the Fund.

Mortgage & Asset Backed Securities Risk: impairment of the value of underlying assets of a mortgage-backed security, such as failure to pay a loan, may result in a reduction in the value of the security.

Credit/Counterparty Risk: a party with whom the Fund contracts for securities may fail to meet its obligations (e.g. fail to pay principal or interest or to settle an FDI) or become bankrupt, which may expose the Fund to a financial loss.

FDI and Leverage Risk: in addition to Counterparty Risk, FDI may fluctuate in value rapidly and leverage embedded in FDI may cause losses that are greater than the original amount paid for the relevant FDI.

Operational Risk: human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

Class Currency Risks: Currency hedging may not be successful in mitigating the effects of exchange rate fluctuations on non-USD classes.

These risk factors are not exhaustive. Please review the "Risk Factors" sections in the prospectus and supplement.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.60%
-----------------	-------

Charges taken from the share class under certain conditions

Performance fee	None
-----------------	------

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you may pay less. You can obtain the exact charges from your financial advisor.

The ongoing charges figure is based on a commitment by the Investment Manager to limit the expenses paid by the Share Class. This commitment may be lifted at any time. It excludes performance fees and portfolio transaction costs other than entry and exit charges for investing in other investment funds (where relevant). This figure may vary from year to year. The exact charges will be included in the financial statements for each year.

For more information about fees and expenses please see the section entitled "Fees and Expenses" of the Company's prospectus available at www.thornburg.com/ucits or from State Street Fund Services (Ireland) Limited (the "Administrator").

Past Performance

%

Performance data represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate so shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than quoted.

The Fund was authorised on 3 May 2017. This Share Class launched on 29 August 2025.

As the Class does not yet have one full calendar year of past performance, there is insufficient data to provide a useful indication of past performance to investors. Performance will be shown calculated in GBP. Performance will be shown after deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The chart shows the performance of the Fund against the Index. The Fund does not track the Index.
