You can find additional information about the Fund at <https://www.thornburg.com/download>. You can also request this information by contacting us at 1-800-847-0200. This report also describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Thornburg International Growth ETF	\$43.00	0.70%

Fund costs may be higher for a full one-year period.

How did the Fund perform during the period and what affected its performance?

The Fund underperformed the MSCI EAFE Growth Net Total Return USD Index (the "Index") during the period from the Fund's inception on January 22, 2025 to August 31, 2025.

Investment selection based on a value factor continued to materially lead versus core and growth styles in international securities, creating a headwind to growth-oriented mandates.

By geography, the Fund's allocation to Brazil contributed to performance relative to the Index, while allocation to the United States detracted. From a sector perspective, stock selection in consumer discretionary and utilities enhanced relative performance. In contrast, the Fund's underweight allocation to industrials, overweight allocation in information technology, and stock selection in both were the lead detractors to relative performance.

How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
