You can find additional information about the Fund at <https://www.thornburg.com/download>. You can also request this information by contacting us at 1-800-847-0200. This report also describes changes to the Fund that occurred during the reporting period.

## What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
<b>Thornburg Core Plus Bond ETF</b>	\$26.00	0.45%

Fund costs may be higher for a full one-year period.

## How did the Fund perform during the period and what affected its performance?

The Fund underperformed the Bloomberg U.S. Aggregate Total Return Value Index USD (the "Index") during the period from the Fund's inception on February 4, 2025 to August 31, 2025.

Top contributors to performance relative to the Index were yield curve positioning within corporate bonds and security selection within sub-investment grade bonds due to a rally in securities with lower credit ratings.

Yield curve positioning within U.S. Treasury securities was the top detractor to relative performance during the period. The Fund maintained an overweight allocation to securities with longer duration relative to the Index and interest rates on the long end of the U.S. Treasury curve rose as the yield curve steepened on economic optimism.

## How did the Fund perform over the past 10 years?

The line graph below reflects a hypothetical \$10,000 investment. The returns shown in the line graph and table assume the reinvestment of dividends and capital gains, but do not reflect the deduction of taxes that a shareholder would pay on distributions or the redemption of Fund shares. The performance information shown below represents past performance and is no guarantee of future results.
